JFJV FACT SHEET

Employment

Working on the LNG Canada Project

As the engineering, procurement, and construction (EPC) contractor for the LNG Canada Project, JGC Fluor BC LNG JV (JFJV) will be creating thousands of jobs over the next few years.

At the peak of construction, it is forecast that there will be about 7,000 people needed for construction, with approximately 4,500 people working at site on any given day.

Work with Us

The majority of employment opportunities will begin mid-to-late 2020. To view or apply for a position with JFJV or any of our subcontractors, visit **jfjvkitimat.com/careers**. All current job opportunities are available on this website.

As the project continues to grow, a wide range of opportunities will become available. We encourage job seekers to check our careers page regularly.

Cedar Valley Lodge

Having high quality worker accommodation is a key component of the project's labour approach to attract and retain workers.

The Cedar Valley Lodge will feature single-occupancy bedrooms with ensuite bathrooms, television, and wi-fi. Workers will also have access to a fitness centre, games room, lounge, and movie theatre.

The project site also has its own health clinic, which provides workers with access to primary, preventative, and mental health care, along with work-related injury evaluation and treatment.

The project work schedule will be a 14/7 rotation, with 14 days of work, followed by 7 days off—allowing people to return home for a week of rest and relaxation. Work schedules may be adjusted from time to time.

Air travel will be organized and paid for by JFJV. In addition, transportation will be provided between the airport and the lodge, as well as the lodge and work site. No personal vehicles are allowed on site.

As prime contractor for the LNG Canada facility, JFJV is responsible for the majority of construction activities, including subcontracting and hiring.

We're striving to make this the Safest Project on Earth and a safe place for everyone.

A Place for Apprentices

Many jobs will offer apprenticeship programs, which depending on the trade, can take from one to four years to complete. Most learning is in the form of on-the-job training, with some classroom training and education sessions. Apprenticeships provide a perfect opportunity to get a start and gain valuable experience. For more information, contact the Industry Training Authority at www.itabc.ca.

Mentoring

JFJV is using Mentorship Matters™, an industry-proven mentorship program, to help foster skill development in the workforce, particularly with apprentices. On-the-job mentoring helps workers learn key skills, establishes best practices, and creates a safer environment.

Getting Ready for Employment

For local residents without construction experience, Kitimat Valley Institute, Coast Mountain College, and StepBC offer useful courses on construction basics — using hand tools, construction math, and the 'ins and outs' of working on a construction site.

Everyone will be Welcome to Work at an Open, Safe, and Harassment-free Site

The LNG Canada Project is an open work site. All contractors — union and non-union — are welcome to work on the project. We are determined to make this the Safest Project on Earth, and that also means building a positive, diverse, harassment-free work site for everyone.

Contact Us

Community feedback is important to us. If you have a question, concern, or complaint, please contact us by telephone at 250.623.JFJV (5358) or toll-free at 1.888.499.JFJV (5358), by email at **info@jfjvkitimat.com**, or on Facebook at **www.facebook.com/jfjvkitimat**.

We want everyone in the community and on site to feel safe, respected, and work together to build the Safest Project on Earth.
