JFJV FACT SHEET

Trades

Your Career in the Trades

If you work in a trade, or think you would like to learn one, the LNG Canada Project is a great opportunity to learn new skills and gain experience.

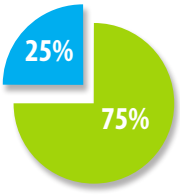

Over the next several years, JGC Fluor BC LNG JV (JFJV) will need thousands of skilled workers to construct the Cedar Valley Lodge, new office buildings, gas liquefaction facilities, roads, and a whole lot more. To do so, the project will employ both union and non-union labourers, and will need just about every kind of trades-person imaginable, including:

Labourers • Carpenters • Cement Masons • Heavy Equipment Operators • Ironworkers • Truck Drivers • Boilermakers • Sheet Metal Workers • Plumbers and Pipefitters • Crane Operators • Electricians • Insulators • Welders • Painters • Warehouse Workers

No Experience Necessary

Many jobs will offer apprenticeship programs, which, depending on the trade, can take from one-to-four years to complete, with most learning in the form of on-the-job training. Apprentices are also required to complete some classroom training and education sessions to support the on-the-job training.

We aim to have at least 25 percent of the total skilled workforce as apprentices.

Mentoring

JFJV is using Mentorship Matters™, an industry-proven mentorship program, to help foster skill development in the workforce, particularly with apprentices. On-the-job mentoring helps workers learn key skills, establishes best practices, and creates a safer environment.

Advancement Opportunities

If you're interested in a civil trade, like a cement mason for example, you can be hired with no experience. You'll be earning an income while you learn, and within a few years you could be a journeyperson. Another couple of years after that, you could be eligible to be a foreperson.

By learning a trade, you can advance your career in a relatively short time.

*varies by trade

Typical Career Advancement Timeline

JGC Fluor BC LNG JV (JFJV) is the prime contractor for the LNG Canada Facility. Over the next several years, we will need thousands of skilled workers — you could be one of them.

JGC | FLUOR BC LNG JV
PRIME CONTRACTOR TO LNG CANADA

We want people who are not only great at what they do, but who also care to contribute to the Safest Project on Earth.

Good people working together will make this a world-class project and a great place to work.

Join our team!

A Safe, Inclusive Workplace

We are committed to making this the Safest Project on Earth, and creating a welcoming workplace for everyone. From the job site to the world-class living quarters (design rendering below), everyone will be treated with respect and given the resources needed to thrive and feel at home.

Home Away from Home

It is important that our workforce is comfortable; workers will stay in the Cedar Valley Lodge, which will be adjacent to the work site and approaches hotel standards with a fitness centre, games room, lounge, and movie theatre.

Local Communities and First Nations

Our goal is to benefit British Columbians and the people who live closest to the project. We're doing everything possible to make that happen, from offering training opportunities before the project gets underway, to giving preferred hiring status for area residents and local First Nation members.

You can learn more about what opportunities best suit you on our website at jfjvkitimat.com/careers. Like the project itself, the opportunity is tremendous and one you won't want to trade away.

Contact Us

Community feedback is important to us. If you have a question, concern, or complaint, please contact us by telephone at 250.623.JFJV (5358) or toll-free at 1.888.499.JFJV (5358), by email at **info@jfjvkitimat.com**, or on Facebook at **www.facebook.com/jfjvkitimat**.

We want everyone in the community and on site to feel safe, respected, and work together to build the Safest Project on Earth.
