JGC Fluor (JFJV) FACT SHEET

Employment

Working on the LNG Canada Project

As the engineering, procurement, and construction (EPC) contractor for the LNG Canada Project, JGC Fluor BC LNG JV (JFJV) has created thousands of jobs since the start of construction activities in 2018.

At the peak of construction, we forecast there will be about 7,000 people needed with approximately 4,500 people working at site on any given day.

A Team that Cares

We want people who are not only great at what they do, but who also care to contribute to the Safest Project on Earth.

The LNG Canada Project is committed to providing a workplace that is diverse, inclusive, and a safe place for everyone.

Work with Us

To view or apply for a position with JFJV or any of our subcontractors, visit **jfjvkitimat.com/careers**. All current job opportunities are available on this website.

As the project continues to grow, a wide range of opportunities will become available. We encourage job seekers to check our careers page regularly.

Cedar Valley Lodge

Having high quality worker accommodation is a key component of the project's approach to attract and retain workers.

Cedar Valley Lodge (CVL) features single-occupancy bedrooms with ensuite bathrooms, television, and wi-fi. Workers also have access to a fitness centre, games room, lounge, and movie theatre.

The project site also has its own health clinics, which provide workers with access to primary, preventative, and mental health care, as well as work-related injury evaluation and treatment.

The project work schedule is a 14/7 rotation, with 14 days of work, followed by 7 days off – allowing people to return home for a week of rest and relaxation. Work schedules may be adjusted from time-to-time.

Air and bus travel is organized and paid for by JFJV. In addition, transportation will be provided between the airport and the lodge, as well as the lodge and work site.

Your Career in the Trades

If you'd like to gain new skills and experience within the trades, the LNG Canada Project is the perfect opportunity.

The Project needs skilled workers to complete construction, employs both union and non-union workers and will require just about every kind of trades-person, including:

Carpenters • Cement Masons • Heavy Equipment Operators • Ironworkers • Truck Drivers • Boilermakers • Sheet Metal Workers • Plumbers • Pipefitters • Crane Operators • Electricians • Insulators • Welders • Painters • Warehouse Workers

A Place for Apprentices

Many jobs will offer apprenticeship programs, which can take one to four years to complete depending on the trade. Most learning is in the form of on-the-job training, with some classroom training and education sessions. Apprenticeships provide a perfect opportunity to get a start and gain valuable experience. For more information on British Columbia apprenticeship pathways, please contact the Industry Training Authority at www.itabc.ca.

Advancement Opportunities

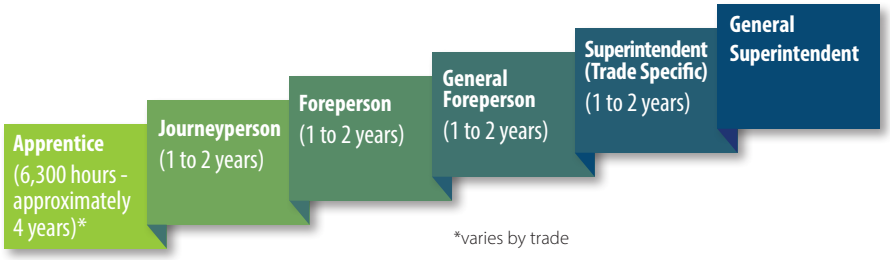

If you're interested in a civil trade, like a cement mason, you can be hired with no experience. Many jobs will offer apprenticeship programs, which can take one to four years to complete depending on the trade. Then, a couple of years later, you could be eligible to become a foreperson.

By learning a trade, you can advance your career in a relatively short time.

Contact Us

Community feedback is important to us. If you have a question, concern, or complaint, please contact us by telephone at 250.623.JFJV (5358) or by email at **info@jfjvkitimat.com**, or on Facebook at **facebook.com/jfjvkitimat**.

We want everyone in the community and on site to work together to build the Safest Project on Earth and to feel safe and respected along the way.

*varies by trade
